that **PRODESK IT, NOIDA** (https://prodesk.in/) will soon hire fresher **TECH -Full Stack Developer/ Frontend Developer/ JAVA Developer/ Python Developer profiles**

Skillset	**Full Stack Developer/ Frontend Developer/ JAVA Developer/ Python Developer**
Location	**NOIDA/ BENGALURU/ WFH**
Education	B.Tech (Any Branch), BCA, MCA, M.Tech B.Sc IT
Mandate Checks	As per the relevant profiles applicable basis Job Description shared in the notice
CTC / Designation	**Freshers-.3.00 to 11.0 LPA**

How to Apply: All Interested students must **give their names** to their **HOD's by 07.02.2026**

Any query students may meet undersigned at Training & Placement Cell between 3 to 5 PM

Interview Process: Technical applicants

- **1st Round**: (i.e. Online Test/Technical 30 Mins)
- **2nd Round**: (i.e. Machine/Coding Test 60 Mins.) (All candidates should have Visual Studio Code installed on their laptops/systems
- **3rd Round**: (HR-Interview) of shortlisted candidates

Note: For JD-1 (*Full Stack Developer*), *there shall be 2 additional technical rounds (total 5 rounds).*

(Mr. Bhupinder Singh Nayar)
Director Training & Placements

CC **1).** Director General for information please

2) HOD-B.Tech CSE, IT & allied branches,HOD-BCA,

JD-1. Job Role: Full Stack Developer

Job Location: Noida / Bengaluru / WFH

Annual CTC: 8 to 11 LPA

Eligibility: B.Tech (Any Branch), BCA, MCA, B.Sc IT
Number of Rounds: 5
Passout Year: 2026
As a Full Stack Developer (AI-Enabled Applications) at Prodesk, you will:

Develop Full Stack Applications

- Build responsive, user-friendly front-end interfaces using HTML5, CSS3, JavaScript, and modern frameworks like React.js
- Develop robust and scalable back-end logic using Node.js, Python (Flask/Django), or Java
- Ensure seamless communication between front-end and back-end via RESTful APIs or GraphQL

Integrate AI into Real-world Applications

- Collaborate with AI/ML teams to integrate models and APIs such as OpenAI (ChatGPT), LangChain, or Hugging Face into live applications
- Work on AI-powered features like chatbots, recommendation engines, text summarization, or intelligent automation workflows

Database Management & Optimization

- Design and manage relational (MySQL/PostgreSQL) and NoSQL (MongoDB) databases
- Optimize database queries for performance and scalability

Testing, Debugging & Quality Assurance

- Write unit and integration tests using tools like Jest, Mocha, or PyTest
- Identify bugs and performance issues, and implement effective solutions
- Follow version control protocols using Git and GitHub for collaborative development

Cloud & Deployment

- Assist in deploying applications on cloud platforms like AWS, Google Cloud, or Firebase
- Set up basic CI/CD pipelines and containerize apps using Docker (under guidance)

Cross-functional Collaboration

- Work closely with UI/UX designers to implement pixel-perfect, user-centric features
- Participate in daily scrums, sprint planning, and code reviews with team members

Documentation & Reporting

- Maintain detailed documentation of code, processes, and API integration
- Report project progress and blockers regularly to the assigned mentor or team lead

Continuous Learning & Improvement

- Stay updated with emerging trends in full-stack development and artificial intelligence
- Proactively learn new libraries, tools, and frameworks as per project requirements

Tech Stack You'll Work With

Front-End: React.js, HTML5, CSS3, JavaScript, Tailwind CSS
Back-End: Node.js, Express.js, Python (Flask/Django), Java
Databases: MongoDB, PostgreSQL, MySQL
AI Tools: OpenAI API, LangChain, Hugging Face, TensorFlow
Cloud: AWS, Google Cloud, Firebase
Version Control & CI/CD: Git, GitHub, Docker, Jenkins (Basic)

JD-2. Job Role: Frontend Developer

Job Location: Noida / WFH

Annual CTC: 3.0 to 5.5 LPA
Eligibility: B.Tech (Any Branch), BCA, MCA, B.Sc(IT)
Passout Year: 2026
Number of Rounds: 3

Key Responsibilities
- Develop a clean and responsive UI using HTML5, CSS3, and JavaScript
- Implement design layouts provided by the UI/UX team
- Work with frontend frameworks/libraries such as React.js or basic JavaScript/jQuery
- Ensure websites and applications are mobile-friendly and cross-browser compatible
- Collaborate with backend developers to integrate APIs and dynamic data
- Test and debug frontend code to ensure a consistent user experience
- Maintain code quality using standard version control practices (Git)

Skills Required
- Strong understanding of HTML, CSS, and JavaScript
- Familiarity with responsive design principles and browser debugging tools
- Basic knowledge of any JavaScript library/framework (React, Angular, or jQuery)
- Good understanding of DOM, events, and client-side validation
- Ability to convert design mockups into functional interfaces
- Strong attention to detail and willingness to learn

JD-3. Job Role: JAVA Developer

Job Location: Noida / Bangalore/ WFH

Annual CTC: 3.2 to 5.6 LPA
Eligibility: B.Tech (Any Branch), BCA, MCA, B.Sc IT
Number of Rounds: 3
Passout Year: 2026

Job Responsibilities (Java Developer):-
• Implementation of all stages of creating Java-based software
• Writing code
• Correct assessment of the customer's requirements
• Develop all necessary app features
• Testing and bug fixing
• Creation of an optimal user interface
• Planning and integration of updates
• Creation of documentation
• Application compliance check

The Java developer job description also includes mediation between the client and all project participants.
After collecting the data, a developer also conducts an analysis, creates the correct terms of reference, and assigns tasks.

Requirements of a Java Developer:-
• Excellent Java engineering skills
• Only candidates who have internship experience are eligible.
• Ability to create user interfaces and Java applications in general
• Bachelor's or master's degree qualification in computer technology or engineering
• Ability to work with Java EE and Spring
• Knowledge of databases, ORM, SQL technologies, and AWS for Java
• Skills in working with templates
• Knowledge of at least one framework.

JD-4. Job Role: Python Developer

Job Location: Noida / WFH

Annual CTC: 3.2 to 4.6 LPA
Eligibility: B.Tech (Any Branch), BCA, MCA, B.Sc IT
Number of Rounds: 3
Passout Year: 2026

Requirements for Python Developer:-
• 0-6 months of experience as a Python developer.
• Only candidates who have internship experience are eligible.
• Must be Python course certified
• Expert knowledge of Python and related frameworks, including Django and Flask.
• Ability to integrate multiple data sources into a single system.
• Ability to collaborate on projects and work independently when required.

Python Developer Responsibilities:-
• Writing scalable code using the Python programming language.
• Testing and debugging applications.
• Developing back-end components.
• Coordinating with development teams to determine application requirements.
• Reprogram existing databases to improve functionality.
